Pet Cremation Equipment

Model A-250P-Quad "Hot Hearth" Cremation Equipment

American Crematory is proud to introduce the A-250P-Quad. The "Quad" was the first animal crematory with four individual cremation chambers. Each chamber is equipped with its own combustion system which allows each chamber to operate independently of the others.

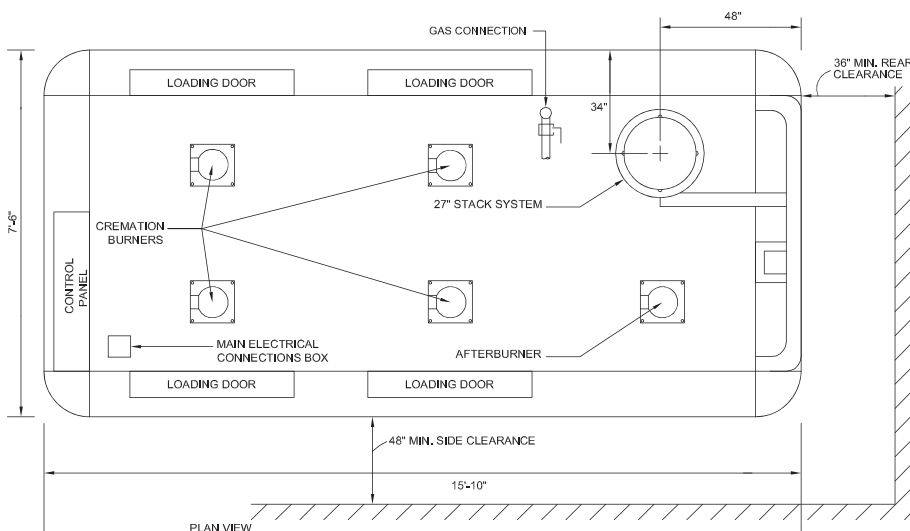

Built on the "Trilogy" platform the A-250P-Quad has the latest in combustion control technology, providing greater efficiency and productivity. With four individual cremation chambers and four individual hydraulic loading doors the Quad is ideal for individual/private cremation and is extremely witness friendly.

Remains Removal Cart

The animal remains removal cart is of a steel frame construction, finished with a powder coated surface. The large work space allows for easy access to sort through remains.

The Original Independently Operated Multi-Chamber Pet Crematory
